Managing Your NetID

The NetID Management Tool (yale.edu/netid) allows you to:

- Activate your NetID
- Reset your password using recovery email
- Change your password
- Change your recovery email
- View the security of your account
- View owned Dependent NetIDs
- Manage DUO devices
Activate NetID

• Activate your NetID so you can access Yale electronic resources
Activate NetID
Select current relationship with Yale and select 'Next'
Activate NetID
Enter your 8 character PIN and Date of Birth, select 'Next'
Activate NetID
Enter a non-Yale recovery email, select 'Next'
Activate NetID
Create a unique password, select 'Next'
Activate NetID
Your NetID is now active, be sure to setup DUO and verify your recovery email
Activate NetID: Verify recovery email
Open your recovery email account and click 'verify email address'. You will then be able to use the 'Forgot NetID Password' option from the main menu.

Your NetID is active - Please verify your recovery email

NetID: ip298

Your NetID is now active and your password has been set. Your NetID and password will give you access to Yale’s network and its many online systems, including your Yale email account. Please be sure to remember your NetID information and keep it safe.

Click the link below to activate your recovery email account as a recovery method for a forgotten password.

VERIFY EMAIL ADDRESS

If you did not make this request, please contact ITS Help Desk at 203-432-9000 or submit a ticket at https://helprme.yale.edu

Do not reply to this email. This message was auto-generated by the Yale NetID Management system.

Security Checkup

This tool can be used to check the security of your NetID account

• Confirm status of:
  - Password Strength
  - Recovery Email
  - Email Security
Security Checkup
Log in through CAS with your NetID and password
Security Checkup

- **Password Strength**: Yale switched to Microsoft’s password complexity rules in June 2020. If your password was last reset prior to that date you are required to change your password one additional time.

- **Recovery Email**: Yale replaced security questions with a recovery email for self service password resets. If you have not already done so, you are required to validate your recovery email.

- **Email Security**: Microsoft will no longer support less secure logins. If your account is using less secure logins, you are required to update your email security in this section of the tool.
Security Checkup: Password Strength
A red 'x' will be displayed if your password needs to be updated.
Security Checkup: Password Strength

Expand the menu and select 'Change NetID Password' to go through the 'Change NetID password' process.
Security Checkup: Recovery Email
A red 'x' will be displayed if you do not have a verified recovery email on file
Security Checkup: Recovery Email

Expand the menu and select 'Change Recovery Email' to go through the process of adding and verifying a recovery email.
Security Checkup: Email Security
There will be a red 'x' next to Email Security if you need to update your account.
Security Checkup: Email Security
Select the arrow to expand the menu section and select the 'learn more' button
Security Checkup: Email Security
Follow the directions on this page and download the PDF for future reference. Then select 'Update email security'.
Security Checkup: Email Security
Email security has been updated, you can download the PDF for future reference.
Find Dependent NetID
Dependent NetID
If there is a dependent NetID associated with your account it will appear here.
Manage DUO Devices

DUO is Yale's Multifactor authentication solution.

This link will bring you to the DUO device manager website

For more information visit https://cybersecurity.yale.edu/mfa
