Phishing is the most common cause of data breaches.

The brands impersonated most often are:

- Microsoft
- Facebook
- Netflix
- Amazon
- Comcast
- PayPal
- Wells Fargo
- Chase

A successful phishing attack can be so convincing that you won’t even know that you were affected.

72% of people say they check to see whether messages are phishy or scarmy.

Join the 42% of people who say they report phishing to their email provider (like Gmail).
